A qualified couple is not linked to a specific product. It is the proof that the external shop is meeting the requirements of the process specification and process instruction and ensures industrial process reproducibility. Any specific product qualification activities e.g. product audit, First Part Qualification (FPQ) and First Article Inspection (FAI) are not affected by this special process couple registration.

Diehl Aircabin reserves the right to withdraw or suspend the qualification at any time for specific reasons, e.g.:

- Lack in quality and/or delivery performance
- Change of frozen manufacturing route without prior acceptance
- Delivery/Production stop
- Contract cessation
- Loss of Supplier Approval
- Evidence of doubts about Supplier Industrial Process effectiveness
